OVERVIEW

The Complete Pool Decking Solution — No Compromises

Pool surrounds are one of the most demanding surface environments in any construction project. The material must simultaneously deliver excellent slip resistance when continuously wet, stay comfortable underfoot in direct sunlight above 45°C, resist chlorine and pool chemical attack, remain UV-stable for decades without colour change, and look beautiful in an outdoor setting. Very few materials meet all of these requirements. Kota Stone meets every single one.

Natural and leather finish Kota Stone achieves R10–R12 wet slip resistance — the highest safety rating achievable for pool environments — dramatically reducing the risk of slipping accidents at pool edges, steps, and wet walkways. This compares directly with polished granite or marble (R9 or below), which become genuinely dangerous surfaces when wet.

Kota Stone also exhibits a critical thermal comfort advantage — its light colour and lower thermal conductivity keep the surface measurably cooler than dark natural stones, dark pavers, or standard ceramic pool tiles in direct Indian summer sunlight. Barefoot comfort around the pool on a peak summer day is a fundamental luxury — and Kota Stone delivers it naturally.

R10–R12 Pool-Safe Wet Slip Rating	Cool Underfoot in Summer Sun	Chlorine Chemical Resistant	UV Colour Stable

KEY ADVANTAGES

Why Kota Stone Outperforms Alternatives

■ R10–R12 Wet Slip Resistance

The maximum wet slip resistance classification. Maintains safe grip even under continuous water splash from pool jets, rain, and barefoot wet traffic around pool edges.

■ Thermally Cool Underfoot

Kota Stone's light colour and lower thermal mass keep the surface significantly cooler than granite, dark marble, or dark-coloured ceramic tiles in direct Indian summer sunlight.

■ Full Chlorine Resistance

Completely unaffected by pool water chemistry, chlorine splash, salt chlorination systems, and common pool treatment chemicals — maintains colour and structural integrity indefinitely.

◆ Proven UV Colour Stability

The natural stone colour does not fade, bleach, or shift tonally under sustained UV exposure — maintaining the same rich blue-green or brown tones for decades of poolside service.

▲ Natural Aesthetic Excellence

The organic stone texture and natural colour palette complement pool water beautifully — creating the resort-like luxury atmosphere that ceramic tiles, pavers, and coatings simply cannot match.

■ Low Cleaning Maintenance

Resists algae and mould growth when properly sealed with a penetrating impregnator. Simple pressure washing maintains a pristine pool deck appearance — no specialist cleaning products needed.

TECHNICAL SPECIFICATIONS

Product Selection Guide

Pool Specification	Natural Finish	Leather Finish
Slip Resistance (Wet)	R11–R12	R10–R11
Thermal Comfort	Excellent	Excellent
Recommended Thickness	25 mm	25 mm
Chlorine Resistance	Excellent	Excellent
UV Stability	Excellent	Excellent
Maintenance Level	Low	Low
Best For	Lap pools, public pools	Luxury pools, resort spas
Sealer Recommended	Yes — Penetrating	Yes — Penetrating
Joint Grout	Flexible Pool Grout	Flexible Pool Grout

PROJECT TYPES

Where We Supply

■ Luxury Residential Pool Decks

Villa and bungalow private swimming pools — creating a luxury resort aesthetic in private homes with natural Kota Stone surrounds that age beautifully.

■ 5-Star Resort & Hotel Pool Decks

Premium resorts and boutique hotels use Kota Stone pool surrounds for the natural, organic luxury aesthetic that complements high-end hospitality landscaping and pool design.

■ Apartment & Society Pools

Apartment complex club house pools benefit from Kota Stone's exceptional durability and very low collective maintenance requirements — ideal for shared facilities with high daily usage.

◆ Spa & Wellness Pools

Hydrotherapy pools, heated relaxation pools, hot tubs, and spa wet areas — Kota Stone creates a premium natural wellness environment that synthetic materials cannot replicate.

▲ Sports & Athletic Pools

Olympic training facilities, fitness club pools, and water sports centres need the extreme durability, slip safety, and easy maintenance of natural Kota Stone around high-use pools.

■ Water Features & Ornamental Pools

Garden reflecting pools, ornamental fountains, koi ponds, and water feature surrounds — Kota Stone creates stunning natural focal points in any landscape design.

GET STARTED

Request Samples - Get a Quote

Specify Kota Stone pool surrounds for your residential, resort, or commercial swimming pool project. We supply anti-slip natural and leather finish Kota Stone with full technical documentation including DIN 51130 slip resistance test certificates. Free samples and competitive bulk pricing available.
