ABOUT THIS PRODUCT

What is Polished Finish Kota Stone?

Polished Kota Stone undergoes a rigorous multi-stage diamond polishing process, progressing through a sequence of abrasive grits — from 80 grit through to 3,000 grit — until the surface achieves a highly reflective, mirror-like sheen with a gloss reading of 60–90 Gloss Units. The process is performed on calibrated grinding machines under controlled conditions to ensure uniform gloss level across entire project quantities.

The polished finish is the most glamorous and visually dramatic expression of Kota Stone. It is the preferred choice for luxury hotel lobbies, five-star resort interiors, upscale residential living spaces, retail showrooms, and corporate reception areas where visual impact and brand impression are paramount.

Despite the high-gloss finish, polished Kota Stone retains all of the material's inherent structural and durability properties. It is easier to clean than matte surfaces, resistant to everyday chemical spills, and develops a beautiful deep patina over time that only enhances its character.

KEY FEATURES & BENEFITS

Why Professionals Choose This Stone

■ Mirror-Like Light Reflection

The high-gloss surface reflects both natural and artificial light, creating a stunning visual effect that makes interior spaces appear larger, brighter, and more luxurious.

■ Amplified Natural Colour

Polishing intensifies Kota Stone's characteristic pigmentation — making the blue-green or brown tones deeper, more vivid, and visually striking compared to matte finishes.

■ Effortless Surface Maintenance

The smooth, closed-pore polished surface is the easiest Kota Stone finish to clean. Simple damp mopping removes all surface contaminants without residue.

◆ Premium Aesthetic at Lower Cost

Delivers the luxury visual impression of polished marble or granite at a fraction of the material cost — the preferred choice for budget-conscious luxury projects.

▲ Scratch & Chemical Resistance

The dense, closed-pore polished surface resists everyday surface scratching, common chemical spills, and staining from oils, beverages, and cleaning agents.

■ Uniform Quality Across Batches

Our controlled polishing process ensures uniform gloss level, colour consistency, and surface flatness across every slab in a project — no variation between deliveries.

TECHNICAL SPECIFICATIONS

Physical & Mechanical Properties

Property	Value	Standard
Finish Classification	High-Gloss Mirror Polish	—
Gloss Level	60–90 Gloss Units (GU)	ASTM C1299
Surface Roughness (Ra)	0.05–0.2 µm	ISO 4287
Slip Rating (Dry)	R9 (adequate for dry indoor)	DIN 51130
Water Absorption	< 0.5%	IS 1124
Compressive Strength	≥ 70 MPa	IS 1121
Chemical Resistance	Good (avoid acids)	—
Available Variants	Kota Blue & Kota Brown	—
Recommended Environment	Indoor — Dry Areas Only	—
Re-polish Interval	5–10 years (high traffic)	—

Available Sizes

- 600 × 600 mm — Standard Module
- 600 × 900 mm — Large Plank
- 300 × 600 mm — Plank Format
- 400 × 400 mm — Classic Square
- Custom Cut — Any Dimension

Thickness Options

- 10–12 mm — Wall Cladding Panels
- 18–20 mm — Standard Flooring
- 25 mm — Premium Commercial Floor

IDEAL APPLICATIONS

Project Types & Use Cases

■ Hotel & Resort Lobbies

The mirror finish creates a dramatic first impression in hospitality spaces, complementing chandeliers, marble reception desks, and luxury furnishings.

■ Luxury Retail Showrooms

Luxury retail brands and high-end product showrooms use polished Kota Stone to create a pristine, upscale sales environment that elevates product presentation.

■ Corporate Reception & Lobbies

Projects a prestigious, permanent quality impression in corporate headquarters, financial institutions, law firms, and executive office reception areas.

◆ Premium Residences

Master bedrooms, formal living rooms, drawing rooms, and upscale dining areas — polished stone creates an air of refined, understated elegance.

▲ Healthcare Corridors

Easy-to-sanitise, smooth surface with excellent chemical resistance is ideal for hospital corridors, clinical areas, and healthcare facility flooring.

■ Feature Wall Panels

Polished Kota Stone cladding panels create visually striking feature walls in residential and commercial settings with minimal grout joints and seamless appearance.

CARE & MAINTENANCE

Keeping Your Kota Stone in Perfect Condition

■ Daily Care

Sweep daily with a microfibre mop. Wet mop with pH-neutral stone cleaner diluted in warm water. Dry with a clean cloth to avoid water spots on polished surfaces.

■ Protection

Use felt pads under all furniture. Place entry mats at doors to trap grit. Avoid dragging abrasive objects. Use stone-safe cleaning products only — avoid vinegar, bleach, and citrus.

■ Re-polishing

In high-traffic commercial areas, a light machine re-polish may be required every 5–10 years to restore full mirror gloss. This is a simple on-site operation requiring no stone replacement.

▲ Stain Response

Blot spills immediately with a clean cloth. For oil-based stains, apply a baking soda poultice. For wine or coffee, use a hydrogen peroxide stone poultice. Always rinse thoroughly after treatment.

GET STARTED

Request Samples - Get a Quote

Transform your interior with the premium gloss of polished Kota Stone. Request free finish samples in both Kota Blue and Kota Brown, or obtain a bulk quotation for your project. Available for residential, hospitality, retail, and institutional projects of all scales.
